Abstract

Extended abstracts can include tables, figures, display equations, footnotes, or references. Extended abstracts should be at least **two** pages, but not more than **five** pages in length.

Keywords (3-5):

Introduction

The introduction section should (1) present the scope and objective of the paper and state the problem, (2) briefly review the pertinent literature, (3) describe the methods, and (4) provide an overview of the main results of the work. The author also should seek to answer the question “Why this research matters. Is this research making a contribution to theory and/or practice?”

Methodology

The methodology must be clearly stated and described in sufficient detail or with sufficient references. The author should concisely summarize the research framework, and the research methods applied in the study. The summary should include the identification of valid data sources used in the research.

Findings or Results

The author shall summarize and briefly discuss any findings in this section. The author can use a combination of tables, figures, and text to provide the summary. The number of tables and figures are limited to no more than two each for the entire extended abstract.

Conclusions

Conclusions should include (1) the principles and generalizations inferred from the results, (2) any exceptions, problems or limitations of the work, and (3) theoretical and/or practical implications of the work. All conclusions offered should be supported by the information provided in the “Findings” section

Acknowledgments

An author's statement of indebtedness to others.

References

This is any relevant information cited in the body of the extended abstract.
